

# Making a difference for PreK–8 students

## Imagine Learning's research-based programs inspire breakthroughs in learning

Imagine Learning partners with educators to provide digital curriculum programs that ignite engagement, amplify confidence, and maximize personal relevance for students in grades PreK–8.

### Literacy

#### Imagine Language & Literacy

Imagine Language & Literacy is a personalized learning solution that accelerates reading and language proficiency for students in grades PreK–6.

- Direct, explicit instruction in all five components of reading—phonological awareness, phonics, fluency, vocabulary, and comprehension—builds a strong foundation in literacy.
- Read-and-record activities help students develop and monitor their oral reading fluency—and help teachers capture running records automatically.
- Strategic scaffolding for English learners includes L1 support in 15 languages.

#### Imagine Español

Imagine Español is a personalized learning solution that accelerates Spanish language and literacy development for students in grades PreK–2.

- Teach students the foundational skills essential to bilingualism, biliteracy, and cultural competence.
- Authentic, original content respects and reflects the uniqueness of the Spanish language.

#### Imagine Reading

Imagine Reading is a research-based supplemental solution that helps students in grades 3–8 become strong readers, critical thinkers, and confident communicators.

- Cross-curricular text sets help students practice reading across the content areas.
- Instructional videos and multimedia supports—integrated at point of use—scaffold students up to reading complex, grade-level texts.

## Math

### Imagine Math PreK–2

Imagine Math PreK–2 is an adaptive, online, early-learning math program intentionally designed to inspire a lifelong love of math.

- Highly engaging and academically rigorous; early learners explore foundational math concepts.
- Covers counting and cardinality, numbers and operations, geometry and logical reasoning, measurement and data, algebraic thinking, and real-world word problems.
- Dual language support; available in English and Spanish.

### Imagine Math 3+

Imagine Math 3+ (3–8, Algebra 1/Geometry) is a supplemental, differentiated, curriculum that motivates students to learn, understand, and love math.

- Rigorous, standards-aligned, and language-rich curriculum with assessments aligned to the Quantile® Framework for Mathematics.
- Highly personalized, with live, certified, bilingual teachers available to support each student's needs.
- First-language support for English learners with contextualized vocabulary and multiple representations.

### Imagine Math Facts

Imagine Math Facts (Elementary & Middle School) is an engaging, game-like, learning experience that captivates students while they solidify math fact fluency.

- Builds automaticity for algebraic readiness.
- Engaging 3D game-play with built-in rewards engage students.
- Detailed, interactive progress reports showing student growth.

## Imagine Learning Language Advantage™

Our excellence in language development throughout our classroom solutions unlocks learning across all subjects and transforms students into stronger, more confident learners.
