WATER WONDERS

Engineers and Nature Working Together in Florida

Join a community of Florida educators inspiring young scientists through hands-on, minds-on science experiences

PROGRAM EXPERIENCE

Water Wonders is a sequence of hands-on science provocations for PreK and kindergarten children. The experiences intentionally deepen over time, encouraging curiosity, problem-solving, and early scientific thinking through everyday, developmentally appropriate materials. Children explore the water systems in their local Florida communities through investigations that connect science to their local environment, culture, and everyday experiences.

WHAT YOU'LL RECEIVE:

In-Person Kickoff Training

Over \$600 worth of classroom science materials

7 Monthly Virtual Communities of Practice

Up to \$150 stipends for teachers for participation

ADDITIONAL OPPORTUNITIES:

Opportunity to present at national conferences

Invitation for select teachers to the Early Science Initiative Network Meeting inclusive of travel expenses

Be part of a Florida collaborative, innovative educator community
